BASICS OF TRAVERTINE SELECTION, FABRICATION, INSTALLATION, & MAINTENANCE

The image shows a cross-section of sedimentary rock layers in various colors (blue, green, yellow, red, orange, brown). A label 'Sedimentary Rock' points to the top layer. To the right is a slide titled 'Travertine Defined' with a definition and the Natural Stone Institute logo.

Travertine Defined

A finely crystalline, massive deposit of calcium carbonate, of white, tan, or cream color, formed by chemical precipitation from solution in surface and ground waters, as around the mouth of springs, especially hot springs.

NATURAL STONE INSTITUTE

AIA COURSE NUMBER: NSI39, 1 LU|HSW

IDCEC COURSE NUMBER: 106088-R1,
SUBJECT CODE: 5.3, 0.1 HSW CEU

LACES COURSE NUMBER: NSI05, 1.0 HSW

NKBA: 0.1 CEU

PROGRAM LENGTH: 60 MINUTES

CEU COURSE FOR ARCHITECTS & DESIGNERS

BASICS OF TRAVERTINE SELECTION, FABRICATION, INSTALLATION, & MAINTENANCE

Basics of Travertine Selection, Fabrication, Installation, & Maintenance

This one-hour class is designed for design professionals to gain a full understanding of travertine as a building material. Learn more about how to select this natural stone for a variety of interior and exterior applications. Gain an understanding of how travertine is fabricated and its unique application opportunities to enhance your design plans. Obtain information about setting the proper consumer expectation in regards to installation and maintenance.

Learning objectives include:

- Learn about the travertine selection process and how to identify quality material.
- Obtain information on travertine uses and limitations in both interior and exterior settings.
- Gain an understanding about how travertine is fabricated and installed.
- Learn about how to maintain and care for travertine after it has been installed.
